PERSONAL PROJECTS	(post-graduation) <ul style="list-style-type: none">– Zombie Game (Java, Slick2D, MarteEngine)– Crowd-sourced dictionary (Rails, PostgreSQL, Bootstrap)– iOS 2D dodge game (Cocos2D)– StackOverflow Clone (Rails, MongoDB, Bootstrap)– Instagram Tag Viewer (Rails, Backbone.js)	2012 2014 2014 2015 2015
WORK EXPERIENCE	Web Engineer <i>Kiramex キラメクス</i> Techacademy (Rails, MySQL, Rspec) <ul style="list-style-type: none">– Create the scheduling system for an online programming bootcamp service (8-week system)– Integrated the scheduling with google calendar for easier in-house management and more automated scheduling	May 2015 - September 2015

Web Engineer (Part-time)

April 2014 - February 2015

Anydoor Inc.

Conyac (Rails, MySQL, Redis, Capybara)

- Development (mostly bug maintenance and reading through a lot of code)
- Web scraping on major websites for marketing purposes

ReShare (Sencha Touch)

- Develop small features on iOS mobile app ReShare

Freelance (Python, Django)

Jan 2014

Helped a client design parts of his schema, the website design, and setup the user authentication for the site.

- Learned and used the Django user authentication system (along with other features)
- Consulted with the client for problem areas in the code

Junior Web Developer

October 2012 - November 2013

Tailwind Web LLC

Independa - Caregiver Web Application (Django, Python, South, Celery, Postgres, Nginx, Apache, AWS EC2, Heroku)

- Fix bugs, add small features, a lot of time spent data modeling and migrations
- Managed the web servers for development, deployment to production, custom data migrations, etc. (under a non-continuous integration at this point)
- Wrote a daily bash script for daily database backup storage for the previous month (during pre-Heroku stage)

Independa - Angela - Caregiver Client Application (HTML, CSS, JS, Backbone, Marionette, Require, Grunt)

- Fix critical bugs on legacy code without the modern javascript frameworks we have today
- Develop integration with new web services API

Olio (Rails, Ember)

- Helped to fix bugs on small backend parts of a single-page client project resembling that of a restaurant menu

Java Internship (10 weeks)

Summer 2011

Southern California Edison

Worked on creating a more efficient way of updating utility pricing data

- Backend development by comparing local database and foreign website's dataset (involving Java, XML, SQL)

**VOLUNTEER
/LEADERSHIP
EXPERIENCE****Library Lab Volunteer**

Summer 2007

- Assisted patrons in basic computer use
- Ensure environment remains a quiet workplace, not a playroom.

Team Leader (Online Gaming)

2006-2007

- Managed and played in weekly team practices
- Devised strategies and engaged in team discussions
- Organized scrimmages and matches in a few competitive leagues
